

Telnet Test

SUREN NETWORK
PLAY WITH TECHNOLOGIES

Write a command for this scenario ?

1. Set password for console login (only password)
2. Set telnet authentication for three user with username password
3. Set enable secret password as (12345)

Command line interface

Router > enable

Router # configure terminal

① Console login - Password only

Router (config)# Line console 0

Router (config-line) # Password console123

Router (config-line) # login

Router (config-line) # Exit.

② Create 3 user For Telnet authentication.

Router (config) # username user1 privilege 15 secret
Password 1

Router (config) # username user2 privilege 15 secret
Password 2

Router (config) # username user3 privilege 15 secret
Password 3

Router (config) # line vty 0 4

Router (config-line) # login local

Router (config-line) # transport input telnet

Router (config-line) # exit.

③ Enable Secret Router

Router (config) # enable secret 12345

Router (config) # end

Router # write memory.

Write a command for this scenario ?

Enable ssh for three user with username password

Command line interface

Router > enable

Router # configure terminal.

Router(config) # username user1 privilege 15
secret Password 1

Router(config) # username user2 privilege 15 secret
Password 2

Router(config) # username user3 privilege 15 secret
Password 3

Router(config) # ip domain-name suren.com

Router(config) # crypto key generate rsa modulus 1024

Router(config) # ip ssh version 2

Router(config) # line vty 0 4

Router(config-line) # login local

Router(config-line) # transport input ssh.

Router(config-line) # exit.

Router(config) # end.

Router # write memory.
